Hazardous Area Product Overview Information Sheet

In many chemical, pharmaceutical and petrochemical environments there is a requirement for automatic industrial doors and gates.

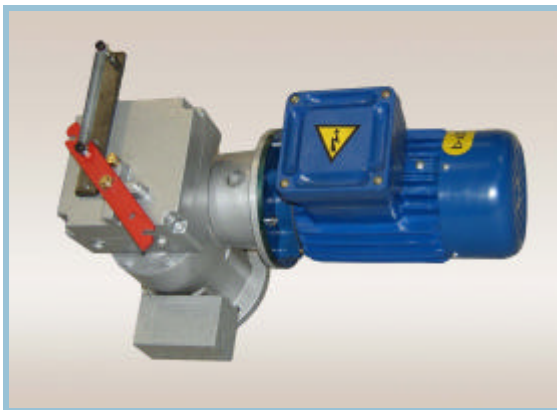

CDO-50

Hazardous areas are places in which a dangerous explosive atmosphere exists as a result of local and operational conditions.

An explosive atmosphere is a mixture of air and combustible gases, vapours, fumes or dust under conditions where combustion expands itself after ignition.

VRFHL-50

The selection of hazardous area equipment starts with recognition or classification of the area in which the equipment is to operate, this must be specified to ensure the correct level of protection.

Link Controls offer many operators and controls off the shelf and can design and build custom solutions for hazardous area applications.
